

### ErgoFloor Safety Mats for Grass - Grass Mats

Our Safety Mats for installation on sub-bases of grass, sand and soil etc. is the absolute cheapest solution for the establishment of a playground safety surface.

In addition to their function as safety surface, the Safety Mats protects the grass roots against wear and acts as a "reinforcement" of the sub-base.

The Safety Mats can normally be installed without any preparation of the sub-base besides leveling of the worst bumps.

Also ideal for use in top of playground drop sand to minimize maintenance and problems with cat stools and urine.

### **Characteristics:**

- **Size:** 1500x1000x22 mm.
- Tested as safety surface to a fall height of 3,5 m on a natural grass sub-base. We recommend however that our Safety Mats not be used by fall heights beyond 2,0 m
- Tested as safety surface to a fall height of 1,0 m on a concrete sub-base.
- **Easy installation:** The Safety mats are joined with plastic strips and fixed to the sub-base by plastic pegs.
- Creates a comfortable and clean surface regardless the weather conditions.
- No maintenance besides mowing the lawn when needed.
